

## GYPSEMNA FURRING CHANNEL

### METAL PROFILES

### DESCRIPTION

Gypsemna Furring Channel (hat-shaped) is the secondary member for a ceiling metal framework. It is a cold roll-formed from hot-dipped galvanised steel and is suitable for use in for conventional ceiling and cinema systems.

### BASIC USES

The Furring Channel is fixed to the main channel with wafer-head screws through the flange. The gypsum boards are then fastened directly to the furring channel.

### ADVANTAGES

- Consistently high quality.
- Corrosion resistant.

### TECHNICAL DATA

#### PHYSICAL PROPERTIES

Coating Z120, Z180 and Z275 Zinc coating

Standard compliance ASTM C645 and ASTM A653

Material Cold roll-formed from hot-dipped galvanised Steel

Thickness (mm) 0.50, 0.55, 0.60, 0.80, 0.90, 1.00 and 1.20

Width (mm) 64 x 35 x 23

Length (mm) 3000
