

GYPSEMNA

RGLW-12.5mm

GYPSUM BOARD
09 29 00/GC

■ DESCRIPTION

The Gypsemna's REGULAR LIGHT WEIGHT (RG LW - 12.5mm) Type A Gypsum Board is an interior gypsum board consisting of a solid set, Type C gypsum core enclosed in GRAY-colored face paper Gypsemna's RG LW Type A board. Long edges are slightly tapered, allowing joints to be reinforced and concealed with joint tape and joint compound. The face paper and the back paper are 100 % recycled.

■ BASIC USES

The Gypsemna's REGULAR LIGHT WEIGHT (RG LW - 12.5mm) Type A Gypsum Board is used for interior ceilings. It can be used for new construction or renovations. The boards are typically screwed to studs spaced maximum (600 mm) also can be applied by laminating or with the use of an adhesive.

■ ADVANTAGES

- Consistently high quality.
- Uniformly flat, attractive appearance, no shadows.
- Uniform high-strength cores eliminate crumbling, cracking.
- Edge tapers consistent to form perfect joints.
- High edge hardness.
- Green certified & Qualifies as a low VOC.
